### Personal Statement

I have recently completed a **Web Developer** course with Udemy and I am now seeking the opportunity to utilise my academic knowledge and practical experience to progress in a professional **Web and Software Development** environment. Throughout my career, I have proven success in embedding new systems and software to improve operational efficiencies and productivity. I am accustomed to working on numerous work streams simultaneously, and can schedule tasks in accordance with their priority and designated timescales.

### Key Skills

Technically Astute | Systems Development | Numeracy | Issue Resolution | Communications | Organisation | Analysis  
Change Management | Leadership | Stakeholder Engagement | Forecasting | Troubleshooting

### Technical Proficiencies

HTML | CSS | JavaScript | React | Express | MongoDB | Material UI | Charts.js | Moment.js | GitHub | Node JS

### Professional History

#### Export Clerk | Morrisons Retail Distribution Centre (UK)

Nov 2012 to Present Day

- Leading and supporting the daily operations of the team, and processing the deliveries to Gibraltar
- Remaining self-educated in all EU legislation to ensure complete compliance is achieved
- Establishing strong lines of communications with customs officials
- Creating excellent professional relationships with contractors and internal stakeholders across all departments
- Ensuring that all products are delivered in the correct quantities to the right store in accordance to the set timescales
- Liaising with the Logistics and Supply Chain (LOGSUPP) throughout all processes
- Managing and prioritising large workloads, and proactively resolving any issues that arise
- Participating in high profile business development and change projects

#### Achievements

- Successfully improved the KPI's across all distribution zones
- Personally designed and embedded an "Export Planning Tool":
  - *Simplified the process to estimate the number of daily trailers required*
  - *Enabled the production of charts to identify seasonal spikes and forecast demand*
- Appointed to work within the Implementation Team to embed the Oracle Retailer Warehouse Management Systems:
  - *Supported numerous sites during the implementation and hyper care period*
  - *Created implementation strategies*
  - *Assessed anomalies between new and old systems and troubleshooted the issues*
  - *Embedded robust best practice procedures into an operational environment*
  - *Identified opportunities to improve processes*
  - *Proactively created solutions to prevent operation failures*

#### Early Career
